Michael Jeffrey Jordan
172 Bear Club Drive
Jupiter FL 33477

Dear Michael J. Jordan,

I hope this letter finds you well. My wife and I raised our family in Wilmington, NC and our children went to Laney High School during the same years that Michael Jordan attended. At the time we lived at 122 Beach Road South on Figure 8 Island, Wilmington, NC. The reason for this letter is to introduce you to an opportunity for the Wilmington youth community.

I am a career builder who is currently working on a project called Green Hybrid Habitats. In short, we are building pre-fab green homes that are hurricane, tornado and earthquake resistant. The benefit of a pre-fab is that it can be built much faster than a stick-built structure. I am including our investor letter to give you more information on this project.

One of the aspects we will be implementing for Green Hybrid Habitats is a pay it forward policy. Michael Jordan has been extremely generous with financial assistance after hurricane Florence devastated our community last fall. I had the idea that, using the Green Hybrid Habitat concept, of building a "Michael Jordan Youth Center". This center would be a place where school aged children could go after school, weekends and during summer months to "hang out" with qualified staff. The center would provide structured programs, entertainment, free meals and snacks. In the event of another hurricane, the building could easily be turned into a solid shelter. This building would serve several purposes that our community desperately needs; a structured environment for our school aged children, a solid shelter in the event of another hurricane and leave an amazing legacy for Michael Jordan and family.

Green Hybrid Habitats is not looking for any financial gain. It would simply be incorporated into our "pay it forward" program. We are capable of handling all the details in building this youth center. I would be willing to fly to Florida and meet with you to go over more details. Please let me know as soon as possible.

Sincerely,

Colie Dooley
Green Hybrid Habitats CEO
